EXPERIENCE

R3 AGENCY

Senior SEO Manager

Sep 2020 – Present

- Develop and lead SEO strategies across high-value accounts, aligning technical, content, and authority work to commercial objectives.
- Own technical audits and implementation planning; work closely with dev, content, and paid teams to improve delivery quality.
- Manage client relationships, portfolio budgets, QA standards, and mentoring for junior SEOs.
- Introduced AI-search readiness thinking alongside core SEO delivery.

POWERFUL VISION LTD

SEO Manager

Aug 2018 – Jul 2020

- Led end-to-end SEO campaigns that delivered material revenue growth across client accounts.
- Worked directly with C-level stakeholders to align SEO priorities with wider business goals.
- Managed cross-functional delivery spanning developers and marketing specialists.

PLATFORM81

SEO Manager

Aug 2017 – Aug 2018

- Built a comprehensive SEO service framework from the ground up.
- Provided strategic direction to internal teams, improving delivery consistency and campaign performance.
- Optimised existing client campaigns to improve results and satisfaction.

AFTER DIGITAL

SEO Manager

Sep 2010 – Aug 2017

- Provided high-level SEO consultancy and training across a varied client portfolio, with a particular focus on educational and cultural sectors.
- Managed delivery across Manchester and Glasgow teams and acted as a senior point of support on complex accounts.
- Developed and implemented the organic strategy for Illuminated Mirrors, delivering a 125% increase in organic traffic and 552% revenue growth within the first 6 months.
- Managed broader digital delivery across SEO, paid search, content, and social, while mentoring teams and setting QA standards.

JUST SEARCH

SEO Advisor

Oct 2009 – Sep 2010

- Served as the technical liaison between account managers and the digital marketing team.
- Developed campaign optimisation frameworks and led training for account management teams.
- Specialised in troubleshooting and stabilising complex client accounts.

FIRSTFOUND

SEO Consultant

Nov 2007 – Oct 2009

- Delivered on-page optimisation across a portfolio of client accounts.
- Managed white-label agency relationships and supported retention-focused delivery.
- Built a strong foundation in hands-on SEO execution and account management.

BEYOND CONSULTING

Building with AI

Alongside client work, I've been exploring how far AI-assisted development can go in the hands of someone with deep domain knowledge but no formal engineering background. The result is a suite of live SEO tools and a published iOS app — built entirely using Claude Code and vibe coding, shipped and used by real people.

SEO Tools Suite

Seven browser-based SEO tools built with Claude Code — each solving a specific, real workflow problem.

ON-PAGE

Internal Linking Finder

Discovers internal linking opportunities across a site to strengthen topical authority and improve crawlability.

TECHNICAL

URL Status Checker

Bulk-checks HTTP status codes and redirect chains for any list of URLs, fast and without leaving the browser.

ON-PAGE

Schema Opportunity Finder

TECHNICAL

GTM Inspector

Identifies missing structured data opportunities on any page to boost rich-result eligibility in search.

Audits Google Tag Manager setups — inspects tags, triggers, and variables firing on any URL.

RESEARCH

Keyword Cluster

Groups keyword lists into semantic clusters automatically, making content planning faster and more strategic.

TECHNICAL

Robots.txt Validator

Validates and debugs robots.txt files — checks syntax, tests URL matching, and catches crawl-blocking mistakes.

TECHNICAL

AI Bot Access Tester

Tests whether AI bots and crawlers can access a site — verifies bot permissions, user-agent rules, and crawl accessibility.

All tools built using Claude Code. No prior software engineering background.

iOS App — Exercise Snacks: Desk Breaks

APP STORE · IOS

Exercise Snacks: Desk Breaks

A science-backed iOS app that prompts office workers to take brief movement breaks — typically 10 bodyweight squats — at regular intervals throughout the workday. Built to demonstrate how far AI-assisted development can go without a traditional engineering background.

The app is grounded in peer-reviewed research (Gao et al., 2024) showing that short bouts of bodyweight exercise reduce postprandial blood glucose by 21% — equivalent to frequent walking breaks. It features 30 guided exercises with custom Lottie animations, three notification modes, streak tracking, and a compassionate gamification system inspired by Gentler Streak.

Built with Expo / React Native using Claude Code. Designed, developed, and published independently — no agency, no engineering team.

Guided exercises

21%

Blood glucose reduction (clinical evidence)

3

Notification modes

£49.99

Premium annual subscription

Available on the Apple App Store

These projects represent a deliberate effort to stay at the frontier of what's possible for a practitioner — not just advising clients on AI and search, but building with it.
